## EXTRUSION PRESS:

This is leveraging experience of MIDHANI bringing to life of a discarded press. The press can produce seamless tubes of titanium alloys and stainless steel wire rods, the installation, commissioning of the same completed in the year 2017

(Extrusion press scrapped)

The 1250 ton oil hydraulic Extrusion press, manufactured in the year 1974, supplied by Skoda (Czech), in operation from the year 1981 to 2004, was scrapped by Metal & Steel Factory (MSF), Ishapore (Kolkata) as the press was damaged in a fire accident in the year 2005. The same was procured by MIDHANI for a marginal amount in the year 2015.

(Extrusion press scrapped)

### Extrusion Press :

(Extrusion press at Midhani)

The scrapped press was dismantled and shifted to MIDHANI. The press was overhauled, installed, erected and commissioned at Midhani thereby saving cost for the Company.
